<sup>1</sup> Department of Defense (DoD) research is reported separately from DoD development. DoD states that more than 90 percent of its development obligations reported for universities and colleges are performed at university-administered laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-17 for DoD obligations to individual institutions, by research and development breakdowns.

<sup>2</sup> See Technical Notes, "Categories of Support."

<sup>3</sup> The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the fiscal year (FY) 2000 Federal S&E support survey has again been produced using an interim reporting system as it was for the FYs 1995-99 surveys. Any significant differences between AID's data reported for FYs 1995-2000 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal S&E support survey may also differ from the FYs 1995-2000 submissions since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.
